Ikeja, Lagos.

Profile

Front-end developer passionate about implementing pixel-perfect design prototypes for the web using HTML, CSS, SASS/SCSS, JavaScript, React, Redux and NextJs, while also ensuring great user experience and responsiveness across various devices.

Projects

Would You Rather | **Github**

JavaScript | React | Redux | CSS | HTML

A web app to play the "Would You Rather" quiz. Users can answer questions, submit questions, check their answers compared to other users.

- Wrote components with React.
- Managed user and questions state using Redux.
- Implemented routing with React Router.

Streamsity | **Github**

JavaScript | React | Redux | Deezer API | SASS | HTML

A music streaming site. Songs fetched from the Deezer API.

- Managed music state syncing between music list and audio player using Redux .
- Implemented selection of previous or next song from the audio player.

MyReads | **Github**

React | JavaScript | CSS

A simple book tracking application. Search for books, add them to shelves and also move books from shelf to shelf.

- Built components with React.
- Used React's in-built state management to manage state.

Skills

- Experience in building responsive front-end web applications using HTML, CSS, JavaScript, CSS Animations and SASS/SCSS.
- Great knowledge of using React and Redux to build web applications.
- Converting user interface designs to web pages while writing reusable and maintainable code.
- Ensuring applications are optimized for mobile devices.
- Working with and integrating data from APIs.
- Proficient with modern development tools like Npm, Webpack, Git, Github, Netlify and Heroku.
- Excellent verbal and written communication skills.

Education

Udacity | **Certificate**

Front End Web Developer Nanodegree

2020

University of Ilorin

Bachelor's Degree in Economics

2017
